DUSSEHRA CELEBRATION AT MITATRONICS

BY HADHIYA

We recently celebrated Dussehra at the office, and it was truly a spiritual and joyful occasion. The company invited a poojari to conduct a special pooja, followed by dance and celebrations that brought everyone together. As the festivities came to a close, we all shared a small snack box to mark the end of the event. It was a wonderful way to connect, reflect, and celebrate our achievements as a team

PRACTICAL INNOVATION: THE CUSTOM TEST JIG

BY HADHIYA

At Mitatronics, we're always looking for ways to improve efficiency, and Kajal Sankpal, one of our senior testing engineers, has done just that. Kajal designed a custom Test Jig that simplifies the process of detecting common cathode and anode configurations in displays, a task that previously took valuable time with a multimeter.

This new device not only speeds up the detection process, but it also flags faulty displays, improving accuracy and saving time. By reducing manual errors and streamlining testing, the Test Jig helps our engineers work faster and more efficiently, ultimately enhancing the overall productivity of our production line.

IMS CERTIFICATION ACHIEVED: A MILESTONE FOR MITATRONICS

BY HADHIYA

We are proud to share that Mitatronics has successfully completed the audit for ISO 14001 and ISO 45001, joining our existing ISO 9001 certification. This achievement, reached in less than seven months, is a significant milestone for the company, and we couldn't be more thrilled with the results. As our Managing Director said

"IT HAS ALWAYS BEEN MY DREAM TO SEE MITATRONICS ACHIEVE THE ISO CERTIFICATIONS, AND I AM INCREDIBLY PROUD THAT WE HAVE MADE IT A REALITY."

While we await the final confirmation, the positive feedback from the audit assures us that we've met the necessary standards. A special thanks to Mr. Manjunath, the project coordinator, and to the entire team for their hard work in making this achievement possible. Together, we've turned this dream into a reality.
