Ringling in the New Year with Greener Goals

By Hadhiya

As we usher in the New Year, Mitatronics is committed to enhancing our environment and embracing sustainability. Our recent planting initiative has transformed the factory grounds, filling the air with fresh hope and greenery. This ambitious project reflects our dedication to a cleaner, greener future, and sets the tone for a year of growth and renewal. Join us in celebrating this fresh start and our ongoing journey toward environmental stewardship. Here's to a prosperous and eco-friendly New Year! 🌱

Recognizing 10 Years of Service and Commitment

By Hadhiya

We are proud to celebrate two dedicated team members who have completed 10 years of exceptional service at Mitatronics. To honor their commitment and contributions, we held a special awards ceremony. Their hard work and loyalty have significantly impacted our growth and success. Congratulations on this remarkable milestone! 🎉

Keeping the Air Clean

By Hadhiya

At Mitatronics, ensuring a healthy and safe environment for our employees is a top priority. Recently, we conducted comprehensive aerobiological tests to monitor the air quality within our facilities. These tests are essential for detecting airborne particles, allergens, and potential contaminants, providing us with valuable data to maintain a cleaner workplace.

The results revealed that all measured locations maintained noise levels well within the CPCB standards, with the highest recorded level being 59.7 dBA, below the permissible limits for both day and night. This proactive approach helps us promptly address any potential air quality issues, demonstrating our commitment to maintaining a healthy workplace.

STAY TUNED FOR MORE UPDATES ON OUR ONGOING EFFORTS TO KEEP THE AIR CLEAN AT MITATRONICS.
